Volume 43—2009
Subject Index

Advanced urban freight transportation: 432
Air cargo transportation: 370
Aircraft sizes: 355
Airline integrated planning: 2
Airline scheduling: 336
Analytical solutions: 531
Approximate dynamic programming: 178
Arc routing problems: 287
Baggage-limit policy: 355
Benders decomposition: 86, 301
Braess' paradox: 117
Branch and cut: 267
Branch and price: 267
Capacitated closed-loop supply chain: 301
Capacity of bottlenecks: 395
Cargo routing: 370
Case study: 211
Cell transmission model: 98
Choice behavior: 381
City logistics: 211, 432
Column generation: 56, 198, 267
Combination airlines: 355
Combinatorial auctions: 493
Combined neighborhoods: 301
Conditional piecewise functions: 98
Contact discontinuities: 531
Demand stochasticity: 336
Design conservation constraints: 158
Discontinuous flow-density relationship: 511
Discrete network design: 129
Discretisation: 531
Dispatch windows: 417
Dispersion-and-store model: 98
Door assignment: 198
Driver management: 178
Driver scheduling: 417
Drivers' working hours: 17
Dynamic lot sizing: 244
Dynamic programming: 381
Dynamic traffic assignment: 117
Dynamic user equilibrium: 117
Dynamic vehicle routing problem: 27
Dynamics scheduling: 336
EC regulation 561/2006: 17
Editorial: 407
Entropy solution: 511
Exact algorithms: 408
Experiment: 211
Fleet management: 178
Flexibility: 144
Genetic local search: 129
Heuristics: 408
Hours of service: 417
Hub-and-spoke networks: 86
Hybrid approach: 70
Hybrid predictive control: 27
Implicit bidding approach: 493
Integer multicommodity flow: 70
Integer programming: 2, 321
Integrated short-term planning and management: 432
Inventory/production: 244
Lagrangian relaxation: 455
Large neighbourhood search: 17
Linear integer programming: 287
Logistics: 244
LWR model: 511
Mathematical logic: 98
Mathematical programming: 98
Metaheuristics: 408
Minimum replenishment quantity: 244
Multimodal freight transport: 129
Multiobjective evolutionary algorithms: 198
Network design: 301
Network flows: 493
Network pricing: 473
Network revenue management: 381
Nonlinear transportation problem: 455
Numerical solutions: 531
Optimization: 355
Particle swarm optimization: 27
Passenger-cargo allocation: 355
Pedestrian flow: 395
Pickup and delivery: 267
Pickup-and-delivery system: 27
Price of anarchy: 473
Probabilistic arc routing: 43
Public policy: 211
Rarefaction waves: 531
Ready-mixed concrete delivery: 70
Retail distribution: 211
Riemann problem: 531
Robust optimization: 321
Robust scheduling: 2
Robustness: 144, 321
Scale economies: 86
Schedule and rotation planning: 370
Scheduling: 144
Service network design: 144, 158, 432
Shipment consolidation: 244
Shock waves: 531
Small-package local routing: 43
Stackelberg games: 473
Stochastic programming: 144, 321
Subsidies as incentives: 473
Supply chain network design: 455
Survey: 408
Sustainability: 211
System throughput: 117
Tabu search: 158, 301
Time windows: 211
Timetabling: 321
Traffic and crowd dynamics: 395
Traffic control: 117
Traffic flow: 395, 511
Traveling salesman problem: 408
Truckload procurement: 493
Truckload transportation: 417
Truckload trucking: 178
Valid inequalities: 267
Variable neighborhood search: 70
Vehicle restrictions: 211
Vehicle routing: 17, 43, 56, 211, 432
Vehicle routing problem: 408
Vehicle scheduling: 17
Wardrop equilibrium: 473
WENO scheme: 511
